Type I Student's-t SSG likelihood
Post-convergence ELBO gap behavior: $L_{true}(\xi^\star) - L(\xi^\star)$ against $\frac{p}{2}\log n$
Linear fit: $y = 0.0266x + 0.5271$
$R^2 = 0.9946$
$n = 1000$
$n = 4000$
$n = 8000$
$n = 12000$
$L_{true}(\xi^\star) - L(\xi^\star)$
$\frac{p}{2}\log n$
