Type I Student's-t SSG likelihood
Post-convergence ELBO gap behavior: log(L_true(ξ*) − L(ξ*)) versus log((p/2) log n)
Linear fit: y = 0.917x − 3.068
R² = 0.9922
n = 1000
n = 4000
n = 8000
n = 12000
log(L_true(ξ*) − L(ξ*))
log((p/2) log n)
