Negative-Binomial likelihood and tangent minorizers for different $\xi_i$
True NB likelihood ($y_i = 8$, $m_i = 5$)
Tangent minorizer ($\xi_i = 1.5$)
Tangent minorizer ($\xi_i = 2.8$)
Tangent minorizer ($\xi_i = 3.5$)
Tangent minorizer ($\xi_i = 6.4$)
Likelihood / Tangent minorizer (unnormalized)
