Student's-t likelihood and tangent minorizers for different ξ_i
True Student's-t likelihood ($\nu = 3$)
Tangent minorizer ($\xi_i = 0.5$)
Tangent minorizer ($\xi_i = 1.5$)
Tangent minorizer ($\xi_i = 3.0$)
Tangent minorizer ($\xi_i = 7.0$)
Tangent minorizer ($\xi_i = 50.0$)
Zoom near $\zeta_i = 50.0$
1e−6
Likelihood / Tangent minorizer (unnormalized)
$\zeta_i = \tau(y_i - \mathbf{x}_i^\top \beta)$
